Mark,
Attached is my email referenced below, with attachments. I did not distribute them, I only shared them with Tasya for working purposes to help identify data gaps. The spreadsheets and writeup are still draft at this point, and these are not final PRGs.

Janette –

I saw the following but cannot find the 9/4/20 correspondence and attachments. Would you be able to share that with me?

EPA developed the original PRGs for the Facility in March 2014. Since then, revisions have been required because of changes to assumptions and criteria used to inform the PRGs. Accordingly, EPA has prepared spreadsheets with current criteria for each soil and groundwater contaminant that has been detected at the Facility. These spreadsheets and a detailed explanation of the update were provided to you via email on September 4, 2020.

Subject: additional work required - Pre-CMS Data Gaps - Former Rhone-Poulenc Facility, Tukwila WA

Good morning, Tasya. Attached is EPA's letter regarding determination of need for additional work at the former Rhone-Poulenc facility/ Container Properties. This letter covers the Pre-CMS Data Gaps work we have discussed – the hydraulic control pilot project and other engineering needs, and the update of current conditions. Please let me know if you have any questions.

Regards,
Janette
